

296 GO terms clustered by 'binary_cut'

establishment involved growth migration specification body positive
 planar orientation hair morphogenesis
 units terminal lung branching
 dichotomous subdivision

calciummediated regulation ion degranulation stress
 external detoxification removal death stimulus killer natural
 stressinduced methylglyoxal signaling chemotaxis unfolded
 response cellular oxidative

apoptotic immune
 natural activation class cell mhc differentiation migration
 immunological leukocyte peptide killer
 memory neutrophil mast
 exogenous processing
 presentation antigen

homeostasis

magnesium cajal engulfment iron neurotransmitter import body
 transmembrane across telomerase fluid acyl phagocytosis
 sequestering proline lproline ion
 transport carnitine localization

monooxygenase reductase positive
 regulation activity decarboxylase tyrosine
 pyrrolinecarboxylate ldopa

invagination membrane regulation

histone methylation
 cholesterol sterol insulin linked guanine regulation ldopa granzyme
 process glucosylceramide glyoxal ubiquitination positive small
 deglycation biosynthetic removal

highdensity regulation positive
 clearance lipoprotein particle

cell positive regulation
