

182 GO terms clustered by 'binary_cut'

meiotic process production
 metabolic macrophage translational dna peptide
 colonystimulating granulocyte modification
 dnadependent termination
 replication snrna processing
synthesis pseudouridine
 recombination

migration
 establishment fusion determination formation cell
 epithelium morphogenesis differentiation
 follicular planar neuron polarity
syncytium photoreceptor
 activation signaling pathway

lymphocyte homeostasis proliferation

proliferation

regulation meiotic axon
 positive actin nucleation guidance
bleb volume assembly

regulation positive
production interleukin alpha

localization acid transmembrane signal membrane
 secretion vesicle release synaptic cilium ciliary
 gammaaminobutyric neurotransmitter

transport transepithelial

depolarization positive regulation

signaling pathway apoptotic

motility cilium involved cell regulation

response

cytolysis
