

140 GO terms clustered by 'binary_cut'

structural

binding

binding rna translation compound

protontransporting ion atpasecoupled

mechanism cation potassium atpase

rotational voltagegated

transporter transmembrane

activity channel

ubiquitin ligase

conjugating ubiquitinlike

binding enzyme

hydrolase

geranylgeranyltransferase acting naddependent lyase nadph

groups acceptor rna intramolecular polymerase isomerase

phosphotransferase phosphatase cyclase nadh quinone

activity deacetylase oxidoreductase

activity

binding ion

binding peptide

binding

regulator kinase activity

binding

binding

receptor

neurotrophin binding
